- Elta MD

**MEDICAL GRADE FACIALS**

Medical-grade facials are provided by Bridget. Facials are customized to treat all skin types as well as target blemish-prone skin, aging skin, dehydrated, and irregularly pigmented skin. Greenville Dermatology provides the best Medical Grade skin care products that can treat the most sensitive, reactive skin. All facials are designed to treat acne and promote collagen production. Patients may return immediately to regular activities without downtime.

Our Medical Grade Facials include:

- Collagen Induction Therapy
- Microneedling
- ZO Three-Step Peel
- Obagi Blue Radiance Peel
- Glyderm Chemical Peels

**CHEMICAL PEELS**

<table>
<thead>
<tr>
<th>PEEL TYPE</th>
<th>DURATION</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCA Peel</td>
<td>30 min</td>
<td>TCA is a non-toxic chemical (trichloroacetic acid) peel, used in differing strengths and depths to treat Melasma, dark spots, fine lines, and some types of acne. TCA peel is designed to smooth skin texture, and for acne prone and hyper-pigmented skin.</td>
</tr>
<tr>
<td>OBAGI BLUE RADIANCE</td>
<td>30 min</td>
<td>Obagi Blue Radiance is a superficial salicylic acid-based facial chemical peel. This treatment exfoliates and helps to improve overall complexion by providing firmer, smoother, and brighter-looking skin after just one treatment. This chemical peel requires no downtime and is recommended to be used in a series of treatments for optimal results. This treatment includes: Double Cleanse, Obagi Blue Peel Radiance, and Blue Omnilux light therapy.</td>
</tr>
<tr>
<td>ZO 3-STEP PEEL</td>
<td>30 min</td>
<td>ZO 3-Step Peel is a dual-action, highly effective peel designed to provide skin renewal and stimulation. This peel utilizes a blend of exfoliants, retinol and multi-action agents to significantly improve skin health and treat many signs of aging such as, melasma, acne, fine lines, rough texture, large pores, and dullness. This peel is followed by an at-home treatment. Suitable for all skin types.</td>
</tr>
<tr>
<td>GLYDERM CHEMICAL PEEL</td>
<td>30 min</td>
<td>Glyderm Chemical Peel is a professional grade esterified glycolic acid peel used to reduce mild to moderate appearance of facial aging. This chemical peel targets lines, wrinkles, and mild scarring.</td>
</tr>

Our Chemical Peels can be customized to individual skin concerns, determined before your service in your complimentary consultation.
MEDICAL LASER TREATMENTS

Our laser treatments are performed by our Board Certified Medical Physicians and Medical Laser Technician. These treatments may require mild to moderate downtime and are recommended to be performed in a series of treatments until the desired result is achieved.

INTENSE PULSE LIGHT (IPL)
FACIAL REJUVENATION | 30 – 60 min

Optimized Light technology treatment for superior treatment: hyperpigmentation, redness, and even some deep facial vascularization. This laser treatment also helps stimulate the production of collagen to provide the facial skin with more support which reduces the appearance of fine lines and wrinkles.

LASER HAIR REDUCTION | 15 – 90 min

Non-invasive and effective laser hair reduction treatments are used to treat all areas of the body as well as all skin types. Laser hair reduction may take a series of treatments to achieve desired results.

BTL TIGHTENING | 30 min

The BTL Exilis™ combines radio frequency and ultrasound to tighten skin and address body concerns. The unique EFC™ (Energy Flow Control) ensures the optimal level of power is delivered to the target tissue at all times; energy is being monitored and adjusted in real time. This is a painless procedure and requires no downtime.

COSMETIC INJECTIONS

BOTOX

Greenville Dermatology not only offers Botox, but also Dysport and Xeomin wrinkle reducing agents to improve the appearance of wrinkles on the forehead, and crow’s feet areas.

FILLERS

We offer a wide variety of injectable treatments for wrinkles, acne scars, neck tightening, lip enhancement, brown lifting, volumizing and contouring. Our Physicians are highly trained to use each product to address each patient’s concerns.

Radiess, Sculptra, Voluma, Kybella, Bellafill, Restylane, Juvaderm, Belotero

OTHER TREATMENTS

OMNILUX LIGHT THERAPY | 15 min

Regenerate and stimulate collagen using a combination of different lights delivered at different times. With this treatment, we are able to stimulate the cells that help counteract the effects of aging. Light enhances not only DNA synthesis, but also augments cellular tissue regeneration including collagen deposition. This is a painless procedure and requires no downtime.

SUBCISION | 30 min

An acne scarring treatment; Subcision is a simple, safe, and effective office surgery procedure for treatment of depressed acne scars. It can easily be combined with other treatments such as laser, dermaroller, and scar revisions for maximum efficiency.

COLLAGEN INDUCTION THERAPY/MICRONEEDLING

Microneedling has the ability to stimulate growth of collagen and elastin, which is the key to new, youthful-looking skin. It tightens loose skin, stops fine lines and wrinkles from forming, reduces the size of pores, improves the appearance of acne scars, and helps with sun damage and melasma - all with little downtime.

LEG VEIN TREATMENT | 15 – 90 min

The GentleMax Pro® is a single consolidated system that delivers a range of treatments - all skin type hair removal, as well as pigmented and vascular lesions. It is a dual wavelength laser platform that combines the fastest and most powerful laser with a second laser for high-performance treatment capabilities in terms of speed, efficacy, ease-of-use, outstanding performance, safety and patient satisfaction.

FRACTIONAL LASER RESURFACING | 30 – 60 min

This non-ablative fractional laser treatment stimulates the generation of new collagen, tightens skin, and is designed to treat tough-to-treat skin conditions such as scars, wrinkles, large pores, acne scars, and stretch marks.

Each treatment can be customized to individual skin concerns, determined before your service in your complimentary consultation.
